❇ Quilt Beginnings ❇
Craft-n-Cut Software Class
Supply List

Instructor: Ali Galbraith

Dates: Thursday (10 am – 3 pm) May 24th

Program description: Join Ali to learn the basics of the craft-n-cut software and all the possibilities for taking your projects to the next level. In this class, we'll be taking an applique pattern and turning the applique template into an SVG cut file for the Silhouette Cameo and a machine applique pattern for the embroidery machine.

Pattern: Any applique pattern (make sure to scan the applique template and save it as a Jpeg on your computer)

Supplies:
- Silhouette Cameo and cutting mat
- Laptop with Craft-n-cut software loaded
- USB stick
- Fabric with steam-a-seam or heat-n-bond fused on the back
- Small ruler

Prior to Class: Before class, make sure to scan your applique template into your computer and save it as a Jpeg. Make sure you scan it in at 100%! Also, print out your pattern and your applique template. Prep your fabric and have it ready for cutting (put the steam-a-seam or heat-n-bond on the back and cut it to the size of your cutting mat). If you are unsure of how to scan and save an image to your computer, please contact me **prior to class**.
