Supply List

Instructor: Joyce Petrek

Dates: Fridays, Jan 24 (1-4pm)
Feb 28 (12-3pm)
Mar 27 (1-4pm)
May 1 (1-4pm)

Book: *Go! Outside the Box* by Eleanor Burns

Project description: Join us as we enter our 5th year of AccuQuilt Club! This year we will be using a combination of the Go! Qubes and their companions (Angles & Corners). As we construct a sampler quilt, you will learn how your dies aren't limited to making blocks in just their Qube size.

Our club is structured to begin with show-and-tell. It is so inspiring to see what everyone has been working on! Next will be the overview of how the block is assembled along with any tips and tricks. The remainder of time is for you to cut, sew and visit to your heart's content.

January 24th will be our kick-off meeting where we will discuss what the club looks like, how you can personalize it to fit your taste and what we'll be doing for our first hands-on in February. Just bring yourself and any show and tell you would like to share to our first meeting!

Fabric requirements:

The fabric requirements will depend on which size Qube you will be using. You can reference the details in the book. Any Qube size can be used, you just need to make sure you have the 3 components: Qube, Angles and Corners.

Supplies:

- AccuQuilt Cutter of your choice (don't forget the power cord if bringing the Go! Big)
- Appropriate dies as specified in the pattern each month—don't forget your mats!
- Sewing machine and accessories
- Neutral thread for piecing
- Rotary cutter, mat and ruler

***This is a year-long club paid quarterly**

****We love show and tell—bring what you've been working on and inspire us all!**
