Premier+2 Master Class

Encored Elegance Table Runner

Supply List

Instructor: Libby Van Treese

Dates: October 29, 2020, 10:00 am to 4:00 pm

Bring your lunch or plan to go out. Lunches must be eaten outside the building due to Mask requirement while inside.

Project description: Encored Elegance Table Runner, Beautiful table runner created in **PP2 Ultra Software**. Utilizing the **Modify Module** we will take a design apart and put it back together in different ways to create different motifs for our table runner. It will be designed in a "created hoop" so that we can use the **Encore Feature** to evenly distribute the designs the length of the runner. We will then use the **Split Hoop Wizard** to prepare the design for stitch out in a hoop that you own.

Software Requirements: Premier+2 Ultra. This lesson uses the **Modify Module** which is found in the **Ultra** version of PP2.

Bring a **USB stick** to class to get the original copy of the design that we will be working with. You must have an **External Mouse (PCs)**

We will not stitch the project out in class. Our day will be spent digitizing and you can stitch out in the comfort of your own home. I will demonstrate how to stitch out the repeating design on a Pfaff to go over how to precise position and line up the multiple hoopings.

Supply list for table runner (you will need less if you decide to make a shorter table runner with just 3 designs rather than 5)

- 1 & 5/8 yds. main fabric (embroidery will be on this so not too busy)
- 1/4 yd. accent fabric
- Contrasting embroidery thread and bobbin to match
- Tear away Stabilizer the length of the project (1 & 5/8 yds) and wide enough to span the hoop you will use. Plan to use your largest hoop. The 360mm x 200mm works perfectly if your machine accommodates it.
- Batting 1 & 5/8 yds long by 13" wide
