

Premier+2 Ultra: Basics

Supply List

Instructor: Libby Van Treese

Dates: Tuesday, Feb 25 & Mar 3 (10a-noon)

Project description: Learn the basics of Premier+2 Ultra. Class will cover the ins & outs of how to navigate within Premier. Class will cover the difference between the Ribbon Bar, the Work Area, the Tabs and the various Modules. You will learn how to use Configure to set up your software to your liking and how to Update your software. Learn how to manage your thread collection inside of Premier. Also learn how to organize your designs so that they are easily accessible within the Premier software program.

This is a "must have" class for everyone that is new to the software as well as those more experienced owners that have sort of "muddled" there way through the various areas of the software.

This is a computer class only--no embroidering during class.

Supply Requirements

- Laptop with software loaded and **activated**.
- External Mouse
